

High Power PM Optical Isolator 1064nm

The 1064nm High Power Polarization Maintaining Optical Fiber Isolator is an in-line pigtailed micro-optic component allows light to be transmitted only in the forward direction while blocking the backward transmission. It features high isolation, low insertion loss and high power handling. The optical isolators are commonly used to protect lasers or amplifiers against back-reflected light.

Features

- High Isolation & Extinction Ratio
- Low Insertion Loss
- High Power Handling

Applications

- Fiber Amplifier
- Fiber Laser & Sensor
- Lab & Research
